Bekasi, West Java

## SUMMARY

---

I am a passionate junior developer, with great curiosity and a constant learning attitude. I have the ability to create dynamic websites with javascript programming language, mainly using React.js and managing data using Redux State Management and able to work well with teams. As an Informatics student, I continue to develop my Front End skills into the professional scope.

## EXPERIENCE

---

### Head of Curriculum and Developers Front End (Organization)

08/2023 - Present

Google Developer Student Club UBHARA JAYA
